

## WHAT IS A PREVENTATIVE HEALTH PROGRAM?

We at Lakeside Animal Hospital have developed our Preventative Health Program to provide your pet with the yearly care needed to keep them healthy. Plans include annual head-to-tail physical examinations, necessary vaccinations, parasite prevention, blood and fecal testing. Optional dental cleaning, urinalysis and advanced blood testing are also available.

We are proud to introduce these plans as affordable and predictable monthly payments.

## WHAT ELSE SHOULD I KNOW?

All Preventative Health Program members will be considered “**preferred clients**”, and will receive **FREE OFFICE VISITS** throughout the year - no need to delay when you have a concern about your pet’s health.

**19 Division Street N.  
Kingsville, ON,

<sup>1</sup> In depth assessment: establishes overall health and important baseline information.

<sup>2</sup> Varies based on which vaccinations are due. Some vaccines are given yearly; some every three years.

<sup>3</sup> Detect and treat parasites before they become more serious and difficult to treat.

<sup>4</sup> Varies based on weight of dog and type of heartworm product selected.

<sup>5</sup> Early detection testing: identify any underlying issues before they become more serious and difficult to treat; establish baselines for current and future care.

<sup>6</sup> Does not include tooth extractions.

<sup>7</sup> Adult maintenance diet OR equal value applied to a prescription diet.
